PROFILE

AI & Data Science undergraduate at SAKEC (CGPA 8.64) building production-grade LLM products end-to-end — from legacy code modernization pipelines to ER triage systems. Future founder focused on making powerful AI accessible.

EDUCATION

B.Tech, AI & Data Science — Shah and Anchor Kutchhi Engineering College 2023 – Present · CGPA 8.64

HSC (Science, PCM) — 70% | **SSC** — 88%

PROJECTS

Modernize Now — 9-phase AI pipeline translating legacy COBOL/Java repos into modern Python with real-time WebSocket progress, pytest stubs, and validation reports. Built on Gemini 2.0 Flash + FastAPI + React.

Emergency Triage AI — ER triage assistant combining context pruning, calibrated ML severity classifier, and Gemini reasoning. Achieved 68.73% LLM-token reduction with 100% pipeline validation across 150 cases.

AQI Core — Full-stack air-quality dashboard for 17 Indian cities using OpenWeather + US EPA AQI scoring. 6 analytical tabs, 24h forecast, smart simulation fallback.

HireSync — Adaptive AI onboarding platform that ingests company docs and auto-generates personalized, role-aware workflows for new hires.

PetPal — Voice-enabled pet care companion with wake-word 'Hey JoJo', Gemini NLU, ElevenLabs TTS, health/vaccination tracking, and emergency SOS.
